GENERAL INTRODUCTION

Presentation

This meeting takes place under the first main component of the project: Access to Justice and Legal Aid. During this first meeting devoted to “The universal meaning of Access to Justice. Common elements” we are going to share the international experts’ opinion and the participants’ approach on this topic from their own perspective and respective competences. Through an in-depth and detailed discussion, we will know the current situation related to the topics under discussion and the priorities and needs to be faced through training activities and study visits. We will also define how to better focus training seminars and training packages on this component and what the major issues and what the elements to be taken into account are in order to achieve the objectives of this project. We will discuss the expected results related to this topic as well as the dates and venues of the activities and the profile of the participants and experts/speakers, while bearing in mind the above-mentioned expected results. In addition, some recommendations on this topic will be adopted and we will start working out the final document to be delivered by the working group: the Policy Paper.

Working Method

The starting point is that all the participants should be aware that they are the main players of the Working Group in order to provide the information required and to cooperate in defining the strategy and objectives to be achieved through this project.

We expect the experts participating in this working group to have a good and in-depth knowledge of the topics under discussion and to be able to provide us with a detailed vision of the current situation in their respective countries. We also expect them to have previously prepared themselves for the discussion in order to achieve the most fruitful results. In this context and to ensure a good preparation, the Project Team will provide the participants at least two weeks before the meeting with a draft programme as well as some suggestions of topics for discussion. Nevertheless, the participants should feel free to propose any other topics of their interest.

As the Working Group will only last 2 days, the preliminary preparation of the experts is more than welcome to achieve the objectives at such short notice.

Experts

The experts should have the appropriate profile, a comprehensive knowledge and vision, a sound experience in this field and willing to make an effective contribution to the working group. This will require not only that their country of origin allows them to have enough time available to attend the four meetings planned per component, but more specifically, that between each meeting they have enough time to keep on working together and with the Project Team, virtually through the Project website and/or other means (email, etc.) so as to allow for the continuity of the work and an exchange of information, documentation and ideas with each other.

The quality of the experts proposed is the main guarantee that our joint effort during the Working Groups meetings will result in a good analysis and diagnosis of the situation in each component, and in an exchange of useful, reliable and accurate information. This in turn will lead to a number of proposals for action being made by each WG.

Expected Results

1. To define the overall approach of the topics to be discussed by the international and MP experts.
2. To know the current situation related to access to justice in each MP.
3. To discuss more specifically how the work of the Working Group could contribute to reach the main goals of the project: a) help speed up access procedures, the handling of cases and processing of incoming requests; b) promote exchanges of experiences between the Mediterranean countries and the EU on methods for informing people involved in legal proceedings of their rights; c) support the use of alternative conflict-resolution methods such as mediation, other alternative dispute settlement methods and the appointment of a justice of the peace; d) help advance legislative reforms designed to ensure full respect for human rights, particularly the right to a defence; e) help to develop systems that will offer the possibility of free advice to people on low incomes; facilitate the exchange of views and experiences in respect to questions linked with the discrimination of women.
4. To define how to better focus the future activities to be developed under this component (including training activities and training packages) and what the major issues and elements to be taken into account are in order to achieve the objectives of this project.
5. To create a provisional list of possible actions/recommendations that could be developed/ adopted in the MEDA region related to this component.
6. To start working out the Policy Paper.

Documentation

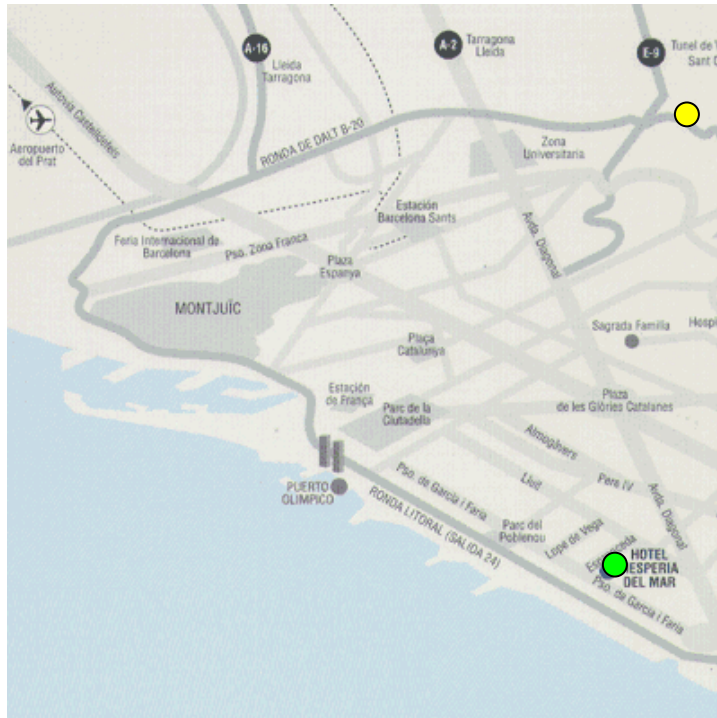

A list of the basic documentation will be discussed/provided by the Project Team at least two weeks before the Working Group meeting:
